Our dynamic speaker, **ABBY JOHNSON**, worked for Planned Parenthood for eight years, serving as a community services director, health educator, community liaison, and finally as director of a "health center," running its family planning and abortion programs. In September 2009 she was asked to assist in an ultrasound guided abortion procedure. On the ultrasound screen she watched a 13-week unborn baby fight a losing battle for its life, changing her views about life forever. She quickly left Planned Parenthood and joined the local Coalition for Life as a volunteer. Johnson now serves as Chief Research Strategist for Live Action and works on projects with the national 40 Days for Life campaign. She travels the country sharing her story and motivating others to carry forward the fight for life. She has recently published a book about her experiences called "unPLANNED." Abby and her husband Doug have a young daughter and live in Texas.
